

# Leading The Way

## SEEDER BY AMERITYRE

We believe the Amerityre Seeder will outperform any rubber tire on the market today. Produced using Amerityre proprietary formulation results in high performance and extended service life in harsh no till field conditions.

When deciding which tire to buy, consider the cost of down time and planting season timing. With Amerityre seeder products your equipment will run when it counts.

### What Do Farmers Think of Amerityre Seeder Tires?

"I switched over to these Amerityre urethane tires the first part of the season and I'm very happy with the results. Those rubber tires were awful for our area and I would never even get one season out of the rubber. I have over 2,000 acres on these urethane tires and haven't had one problem. I'm not sure how long they will last, but I'm sure it's going to be more than two seasons. These tires are at least 100% better, no chunking or ruined tires – these tires look new compared to the rubber. I'm showing all my friends and telling them to get these tires now."

# Seeder Tires

## BY AMERITYRE

# AMERITYRE TECHNOLOGY: *BEST IN THE FIELD*

**Problem:** Semi-pneumatic rubber tires provide short service life.

**Solution:** Amerityre proprietary urethane tire formulation stands up against field stubble in no-till farming conditions.

**Better:** Performance, durability and outperforms the competition

**Tougher:** Weatherproof and Sun resistant

**Easier:** Reduces maintenance cost and downtime

## Amerityre Seeder

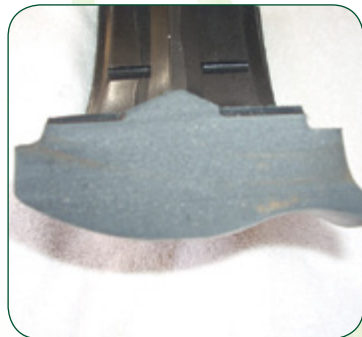

- Extended service life over rubber tires
- Outperforms rubber in harsh "no till" conditions
- Reduces downtime and maintenance costs
- Lowest cost per acre tire solution

### Semi-pneumatic rubber tire

- Can lose shape after one season
- Life expectancy average 400-600 acres
- Highly susceptible to field stubble damage

### Amerityre seeder tire

- Flat proof solution
- Highly resistant to field stubble damage
- Field test results show service life up to 4,000 acres

### Seeder Tire Specs:

#### Normal Seeder: 10-416-80

- Outer dimensions: 15.2"
- Bead width: 2.75"
- Section width: 4.37"

#### Wider Seeder: 10-4.5-16-BLK-AG

- Outer dimensions: 15.2"
- Bead width: 3.01"
- Section width: 4.5"

#### New 2-1/2 Narrow: 10-2.5-16-BLK-AG

- Outer dimensions: 15.2"
- Bead width: 1.45"
- Section width: 2.5"
